

Collin Mitchell  
Manager, Logistics Process  
Sobeys Ontario Division  
(905) 665-9318 x 3018

To whom it may concern:

From June 2005 to November 2006 Sobeys Inc. executed and successfully completed an SAP implementation into it's Ontario Division. As the Functional Lead of the Logistics Lead Line of Business I was responsible for identifying and addressing business gaps, system testing and validation, communication within my Line of Business and End User Training of 240 users. To complete end user training I had the support of 7 Super Users to deliver the training and 1 Learning Specialist to guide the training process.

Kevin Brake worked closely with me and the rest of the Logistics Project team, as Learning Specialist, he guided the framework for creating end user training documents, and presentation materials; he instructed myself and my team on the proper techniques for delivering the material and supported us in the configuration and set-up of our training facilities and training schedules.

In the year or so that I worked with Kevin I found him to be thorough, diligent, well spoken and incredibly knowledgeable of the tools and techniques used for adult learning. Our Line of Business moved smoothly through the transition into SAP, Kevin's assistance in successfully educating our work force is big part of that success. I would gladly recommend Kevin to a position with similar scope and requirements.

Regards,

Collin Mitchell, P.Eng, PMP
